TECHNICAL SKILLS

- CLOUD & INFRA**
AWS (EC2, S3, RDS, Aurora, ECR, EFS, EKS, IAM, CloudWatch, Route53)
- CONTAINERS & ORCHESTRATION**
Docker, Docker Compose, Docker Swarm, Kubernetes, K3s, Proxmox
- CI/CD & AUTOMATION**
GitHub Actions, Jenkins, Bitbucket Pipelines, GitLab CI, Ansible
- OBSERVABILITY**
Grafana, Prometheus, Loki, Promtail
- MESSAGING & IOT**
MQTT, AMQP, WebSockets, RabbitMQ, Mosquitto
- DATABASES**
MySQL, Cassandra
- SYSTEMS & NETWORKING**
Linux (Debian, Ubuntu, CentOS), TCP/IP, DNS, VPN, Nginx
- BUILD & VERSIONING**
Java/Gradle, Dockerizing apps, Git
- VIRTUALIZATION**
Proxmox, VirtualBox, Qemu

- DevOps Engineer — WorkAbout Feb 2023 – Present
- Installed, deployed, and maintained IoT platform architecture with MQTT, AMQP, WebSockets, RabbitMQ, Redis, MySQL, Cassandra, and Tomcat backend services.
- Set up platforms for both on-premises development environments and production client deployments.
- Managed services via systemd, Docker Compose, Docker Swarm, self-hosted K3s, and AWS EKS clusters.
- Automated deployment pipelines using GitHub Actions, Jenkins, and Bitbucket Pipelines to improve release cadence.
- Managed AWS infrastructure (EC2, S3, RDS, Aurora, Route53, Cost Management, ECR, EFS, EKS, SES, IAM, CloudWatch).
- Implemented Grafana with Promtail and Loki for centralized logging and monitoring.
- Built and containerized Java/Gradle applications using Docker.
- Operated a multi-node bare-metal Proxmox cluster supporting company-wide infrastructure.

DevOps Engineer / System Administrator — Zesium Apr 2022 – Feb 2023

- Deployed and maintained Dockerized applications across multiple Linux servers.
- Automated development workflows using Jenkins and integrated GitLab pipelines for continuous deployment.
- Introduced Docker Swarm and Kubernetes for container orchestration.
- Optimized Nginx configurations and resolved network issues for efficient request handling.
- Collaborated with development teams to streamline deployments and meet security standards.

Linux System Administrator — Netex Consulting Sep 2020 – Apr 2022

- Managed Linux infrastructure, including installation and configuration of servers for B2B clients.
- Configured and maintained SIP/VOIP systems for 500+ employees.
- Virtualized environments using Oracle VirtualBox, reducing infrastructure costs.
- Set up VPN and firewall systems to enable secure remote work.
- Created technical documentation and internal training materials.

EDUCATION

Secondary School of Traffic 2007

Srednja saobraćajna škola, Zemun — Field of Study: Traffic Technician
